Portfolio: tianaf-portfolio.vercel.app ↗

Nice to meet you, I'm Tiana, a UX/UI designer.

I spent years designing customer experiences in physical spaces for international brands, and since 2024 I've done the same in digital products. I bring an eye for user behavior and visual hierarchy to every interface I design. My next chapter is digital. I want to grow in it and make sure it stays human, even as AI speeds everything up.

I love aesthetics in all its forms, but I believe it shouldn't come at the expense of comfort.
Bye, heels.

SKILLS

UX/UI: User Research, User Flows, Wireframing, Prototyping, Responsive UI Design, Design Systems
Tools: Figma, Figma AI, Adobe Photoshop, Illustrator, InDesign, WordPress, Elementor
AI Tools: Claude, Midjourney, OpenArt, Google AI

EXPERIENCE

Digital Creative Designer & CS, B2B Startup, Broadcast 2024-2026

- Identified user friction points on the platform and collaborated with the development team to improve the user experience.
- Worked directly with business clients through onboarding and training, translating their needs and feedback into product insights.
- Designed responsive digital content for clients: concepts, landing pages, and brand sites, optimized for mobile and desktop, using AI.

Media Relations Manager, Comms & PR, H&M, 2020-2022

- Led user research, focus groups, and market trend analysis to understand target audiences and their behavior patterns.
- Shaped communication messages for different brand categories and diverse target audiences, keeping brand identity, tone, and messaging consistent.

IWR (Indoor Window Responsibility), H&M 2019-2020

- Planned and built nationwide visual displays for stores and windows across all departments, aligned with business goals and brand identity and adapted to seasonality, holidays and local audiences.
- Collaborated cross-functionally to implement commercial concepts in stores, tracking guideline execution and making adjustments as needed.

VM (Visual Merchandiser), H&M 2016-2019

- Analyzed customer behavior and movement patterns, translating insights into layout and display optimization.
- Built visual displays for departments and windows to create a consistent, customer focused shopping experience.

C&D (Communication & Design), IKEA 2012-2015

- Shaped the in-store customer experience through visual hierarchy, navigation and product presentation to guide clear, confident decision-making.
- Translated business goals and sales KPIs into practical visual solutions while maintaining a consistent customer experience.
